

Anatomy of the Stack

From raw electricity to a verified outcome — and the intelligence threaded through every layer.

The Signal Desk

Intelligence
Signal Processing

Five live feeds, screened and correlated into machine-readable signal.

 OPEN WEB

Publicly available information

 IOT SENSORS

Ambient & industrial telemetry

 PERSONAL DEVICES

Wearable & monitoring data

 GOVERNMENT DATA

Street cameras & public records

 SATELLITE IMAGERY

Overhead & geospatial

FEEDS → AGENT MGMT PLATFORM

07 · THE OUTCOME ▲

Presentation Layer

Where the finished, human-checked result is delivered to the customer.

06 Vertical AI agents

The software delivery mechanism

Workflow-specific agents that turn raw model capability into measurable outcomes.

05 Agent Management Platform

Orchestration & control

Task routing · Tool & memory governance · Multi-agent supervision

04 Large Language Models

The algorithmic core

Frontier foundational models · Open-source architectures · Fine-tuned variants · Research laboratories

03 Infrastructure

The physical architecture

Hyperscale data centers · Cloud platforms · Cluster orchestration · High-performance storage

02 Chips

The hardware engine

GPUs · Specialized accelerators · High-bandwidth memory · Networking silicon · Semiconductor supply chains

01 Energy

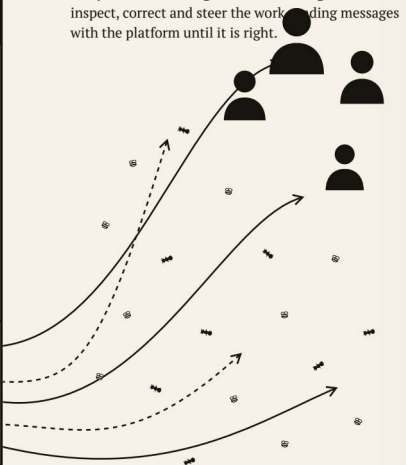

The foundational layer

Electricity · Liquid cooling · Grid access · Power generation · High-voltage transmission

Human in the Loop

The reviewers & the swarm

Many humans — alongside a swarm of agents — inspect, correct and steer the work, adding messages with the platform until it is right.

The Thesis

“The age of one-human-in-the-loop is ending. Group-in-the-loop is beginning.”

A small group of people and their agents take on real work — out in the open, with the record following the person, not the employer.
